# ASX Announcement September 2015 Quarterly Report

### **Highlights:**

- Re-logging of 771 diamond drill holes (102,000m of drilling) completed across the existing Cameron deposit at Chalice's 100%-owned Cameron Gold Project in Ontario, Canada with an additional 30,000 samples to be added to a new resource model.
- New geology model (lithology, alteration and shearing) under construction with an updated mineral resource estimate on track to be finalised in Q4 2015.
- Rock chip litho-geochemistry completed across entire land holding at Cameron, with 12 near-mine targets trenched, mapped and sampled.
- Maiden mineral resource estimate nearing completion for the Croteau Est prospect, part of the joint venture with Northern Superior Resources following infill and exploration drilling during the Quarter.
- Chalice continues to target additional high-potential opportunities in the region and elsewhere.
- Chalice's balance sheet remains strong with cash of ~A\$40.6M at 30 September 2015 with a further US\$2M deferred consideration becoming due and receivable from the sale of the Zara Project in ~late 2015.

### Overview:

Chalice Gold Mines Limited (ASX: CHN, TSX: CXN – "Chalice" or "the Company") is pleased to report on an active period during the September Quarter, during which it carried out work on a number of fronts to progress and de-risk it's 100%-owned **Cameron Gold Project** in Ontario, Canada ("Cameron").

A key focus of activity was to re-log 771 surface and underground diamond drill holes (102,000m) which have been completed historically at the Cameron deposit, as well as to assay an additional 30,000 samples from within and immediately adjacent to the existing mineralisation. This work paves the way for an updated mineral resource estimate in Q4 2015. The progression of a Preliminary Economic Assessment will be subject to the results of the updated mineral resource for the Project.

The Company also ramped up near-mine exploration activity at Cameron during the Quarter which included an initial testing of 12 near-mine targets and completion of a significant regional geochemical sampling exercise. Assay results are pending.

First-pass exploration and resource definition drilling was also completed at the Croteau Est prospect, part of a joint venture with Northern Superior Resources in Quebec, with an initial mineral resource estimate and geological model currently being finalized on the CBSZ prospect and also due for release in the December 2015 Quarter.

Chalice's strategy is to pursue opportunities to advance the Cameron Gold Project – positioning it to take advantage of the strengthening Canadian Dollar gold price – while at the same time seeking opportunities both in the region and further afield in targeted jurisdictions to acquire advanced resource assets.

Chalice Gold Mines Limited, Level 2, 1292 Hay Street, West Perth, Western Australia T: +618 9322 3960 F: +618 9322 5800 E: info@chalicegold.com www.chalicegold.com

### 1. Cameron Gold Project (Chalice 100%)

The Cameron Gold Project is an advanced resource project located in the highly mineralised southern part of western Ontario in Canada, approximately 80km south-east of the town of Kenora. The Project has a number of attractive attributes, including good grades, low political risk in a mature mining jurisdiction with low costs, conventional metallurgy, and a mid-sized gold project that is well within Chalice's funding and development capability.

### **Cameron Gold Project – Geological Modelling**

During the Quarter, the Company's geological team re-logged approximately 102,000m of historical surface and underground diamond drill core (771 holes) for the Cameron deposit, from immediately south of the existing resource, through the resource itself, and extending to approximately 200m north of the deposit.

A new geological model has been constructed for lithology, alteration, structure and mineralisation. In addition to the re-logging exercise, approximately 30,000 new samples were collected from within or immediately adjacent to the known mineralisation and have been added to the mineralisation model. The new model will form the basis of the updated mineral resource, which will be published in Q4 2015.

As the results of this program are currently being compiled and a new mineral resource estimate is currently in progress, the impact on the previously disclosed mineral resources (*refer Appendix 1*) cannot be determined until this revised mineral resource estimate is complete.

Historical core re-logging and sampling (top left – core laid out for logging; top right – samples being dispatched to assay lab; bottom left – geological logging; bottom right – cross section interpretations)

### **Exploration Activities**

The exploration field season at Cameron commenced during the Quarter following a disciplined target generation and ranking exercise. A total of 12 high priority near-mine targets with co-incidental geochemical (MMI, rock chips, till), aeromagnetic and previous drill anomalism were stripped, mapped and channel sampled (Figure 2). Final assays are awaited. Several quartz-carbonate altered shear zones were identified in the trenches.

The near-mine targets have the potential to increase open pittable ounces within economic haulage distance of the Cameron mine.

Stripping high priority, near mine, targets (left – removing overburden; right – washing down prior to mapping and sampling)

Figure 2: Top 12 high priority, near mine, targets trenched, mapped and channel sampled during quarter

Regional rock chip sampling was completed on an approximate 400m x 400m grid for multi-element litho-geochemical analysis (Figure 3). The results are being compiled over existing and newly acquired tenure. In addition, three detailed MMI soil grids were also completed (Figure 4). Again results are being compiled.

The litho-geochemistry and MMI samples are expected to form the basis for follow-up trenching and/or drilling during the 2016 field season.

Figure 3: Regional rock chip sample locations

Figure 4: - Recently completed MMI grid locations

### 2. Croteau Est Project (Chalice earning 65%)

The Company entered into a joint venture agreement with Canadian gold explorer Northern Superior Resources Inc. ('Northern Superior') in April 2015, giving the Company the right to earn a 65% interest in the Croteau Est gold property located near Chibougamau in Quebec (Figure 5). Under the Croteau Est agreement, Chalice can earn a 65% interest in the property by spending a total of C\$4 million on exploration over three years, with a minimum exploration commitment of C\$500,000 in the first 12 months. Upon earning a 65% interest, the joint venture would become a contributing joint venture containing a standard dilution calculation.

Figure 5: Croteau Est Location, Québec

The Croteau Est tenement package includes a 25km strike length of prospective stratigraphy, including a number of targets requiring follow-up and a significant body of quartz-carbonate-sericite alteration and pyrite mineralisation which has been defined as the Croteau Bouchard Shear Zone ("CBSZ").

An 11-hole (2,511m) diamond drill program and a 46-hole (485m) Reverse Circulation (RC) drill program was carried out during the Quarter targeting extensions to the known mineralisation as well as to delineate an initial JORC 2012 compliant Mineral Resource. The results from this program, including geological modelling, are currently being compiled and interpreted, with a maiden mineral resource estimate targeted for completion in Q4 2015.

Chalice has now met its minimum exploration commitment of C\$500,000.

### 3. Gnaweeda Gold Project (Chalice 12%: Doray 88%)

The Company's joint venture partner, Doray Minerals Limited (ASX: DRM) ("Doray"), recently released high grade results from a recent drilling program at the Gnaweeda Gold Project. Doray has stated that the project has potential to deliver additional high grade ounces to be processed at its Andy Well project. Chalice has elected to maintain its participation level in the project pending additional results.

Please refer to the recent Doray announcement at www.dorayminerals.com.au.

### 4. Tenement schedules

In accordance with ASX Listing Rule 5.3, please refer to Appendix 2 for listing of tenements.

### 5. Discussion on Quarterly Cash flow

Chalice's cash reserves were A\$40.6 million as at 30 September 2015. A further US\$2 million is also likely to become due and receivable in late 2015 from China SFEO Group as deferred consideration for the sale of the Zara Gold Project.

During the Quarter, the Company spent \$2.2 million (YTD: \$2.2 million) on exploration and evaluation activities which focused on the re-logging and re-sampling activities at Cameron and drilling at Croteau Est, \$0.4 million (YTD: \$0.4 million) on administration and overhead costs and \$0.2 million (YTD: \$0.2 million) on business development activities.

The impact of foreign exchange rates on the Company's USD cash balances was a favourable movement of \$3.4 million for the Quarter (YTD: \$3.4 million).

Further details are available in the attached Appendix 5B.

#### **Competent Person and Qualifying Person Statements**

The information in this report that relates to Exploration Results in relation to the Cameron Gold Project and the Croteau Est Project is based on information compiled by Mr Gary Snow, who is a Fellow of the Australasian Institute of Mining and Metallurgy and is a Fellow of the Australian Institute of Geoscientists. Mr Snow is a full-time employee of the company and has sufficient experience in the field of activity being reported to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves, and is a Qualified Person under National Instrument 43-101 – 'Standards of Disclosure for Mineral Projects'. The Qualified Person has verified the data disclosed in this release, including sampling, analytical and test data underlying the information contained in this release. Mr Snow consents to the release of information in the form and context in which it appears here.

The information relating to the **Cameron Gold Project Mineral Resource** is extracted from the ASX Announcement entitled "Chalice Files Updated 43-101 Technical Report" released on 29 July 2014 and is available to view at www.chalicegold.com. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not materially modified from the original market announcement.

The information relating to the **Croteau Est Project** is extracted from the ASX Announcement entitled "Chalice expands North American presence with farm-in deal on advanced and highly prospective Canadian gold project" released on 22 April 2015 and is available to view at www.chalicegold.com. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not materially modified from the original market announcement.

#### **Forward Looking Statements**

This document may contain forward-looking information within the meaning of Canadian securities legislation and forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 (collectively, forward-looking statements). These forward-looking statements are made as of the date of this document and Chalice Gold Mines Limited (the Company) does not intend, and does not assume any obligation, to update these forward-looking statements.

Forward-looking statements relate to future events or future performance and reflect Company management's expectations or beliefs regarding future events and include, but are not limited to, statements regarding the impact of additional logging and sampling at the Cameron Project on currently disclosed mineral resources, the results of drilling at Croteau Est on any mineral resource estimate, the impact of potential material reductions in costs on the economics of a future PEA at the Cameron Project, the results of business development activities which may result in a corporate transaction or investment, the estimation of mineral reserve and mineral resources, the realisation of mineral reserve estimates, the likelihood of exploration success, the timing and amount of estimated future production, costs of production, capital expenditures, success of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage.

In certain cases, forward-looking statements can be identified by the use of words such as plans, expects or does not expect, is expected, will, may would, budget, scheduled, estimates, forecasts, intends, anticipates or does not anticipate, or believes, or variations of such words and phrases or statements that certain actions, events or results may, could, would, might or will be taken, occur or be achieved or the negative of these terms or comparable terminology. By their very nature forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements of current exploration activities; the impact of additional logging and sampling at the Cameron Project on currently disclosed mineral resources; changes in project parameters as plans continue to be refined; future prices of mineral resources; possible variations in mineral resources or ore reserves, grade or recovery rates; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities; as well as those factors detailed from time to time in the Company's interim and annual financial statements and management's discussion and analysis of those statements, all of which are filed and available for review on SEDAR at sedar.com. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be

other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements.

Accordingly, readers should not place undue reliance on forward-looking statements.

# Appendix 1 - Cameron Gold Project Resource

As the delineation of an updated mineral resource estimate is currently in progress, the impact on the previously disclosed mineral resources above cannot be determined until this revised mineral resource estimate is complete.

# Appendix 2 – Tenement schedules

The following information is provided in accordance with ASX Listing Rule 5.3 for the quarter ended 30 September 2015:

### 1. Listing of tenements held:

Location	Project	Tenement	Registered Holder	Nature of
		No.		interest
Australia	Gnaweeda	E51/0926	Chalice Gold Mines Limited and Teck Australia Pty Ltd	12.03%
		E51/0927	Chalice Gold Mines Limited and Teck Australia Pty Ltd	12.03%
Canada	Refer appendix 3.			

### 2. Listing of tenements acquired (directly or beneficially) during the quarter:

There were no tenements acquired (directly or beneficially) during the quarter.

### 3. Tenements relinquished, reduced or lapsed (directly or beneficially) during the quarter:

Location	Project	Tenement Type	Tenement No.	Registered Holder	Nature of Interest
Canada	Rainy River	Patent	56046-0077	Shane & Rachel McQuaker	Earning in, Option agreement

+ See chapter 19 for defined terms.

### Appendix 5B Mining exploration entity and oil and gas exploration entity quarterly report

1.13	Total operating and investing cash flows		
	(brought forward)	(2,711)	(2,711)
	Cash flows related to financing activities		
1.14	Proceeds from issues of shares, options, etc.	-	-
1.15	Proceeds from sale of forfeited shares	-	-
1.16	Proceeds from borrowings	-	-
1.17	Repayment of borrowings	-	-
1.18	Dividends paid	-	-
1.19	Other (provide details if material)	-	-
	Net financing cash flows	-	-
	Net increase (decrease) in cash held	(2,711)	(2,711)
1.20	Cash at beginning of quarter/year to date	39,865	39,865
1.21	Exchange rate adjustments to item 1.20	3,411	3,411
1.22	Cash at end of quarter	40,565	40,565

# Payments to directors of the entity, associates of the directors, related entities of the entity and associates of the related entities

		Current quarter \$A'ooo	
1.23	Aggregate amount of payments to the parties included in item 1.2	14	49
1.24	Aggregate amount of loans to the parties included in item 1.10		-

 1.25
 Explanation necessary for an understanding of the transactions

 Item 1.7 - represents costs associated with business development activities.

 Item 1.23 - Amounts paid to related parties includes remuneration, directors' fees and consulting fees paid to directors.

## Non-cash financing and investing activities

2.1 Details of financing and investing transactions which have had a material effect on consolidated assets and liabilities but did not involve cash flows

Nil

2.2 Details of outlays made by other entities to establish or increase their share in projects in which the reporting entity has an interest

Nil

<sup>+</sup> See chapter 19 for defined terms.

# **Financing facilities available** Add notes as necessary for an understanding of the position.

		Amount available	Amount used	
		\$A'000	\$A'000	
3.1	Loan facilities	Nil	Nil	
3.2	Credit standby arrangements	Nil	Nil	

## Estimated cash outflows for next quarter

		\$A'ooo
4.1	Exploration and evaluation	1,470
4.2	Development	-
4.3	Production	-
4.4	Administration	370
	Total	1,840

## **Reconciliation of cash**

show	nciliation of cash at the end of the quarter (as m in the consolidated statement of cash flows) e related items in the accounts is as follows.	Current quarter \$A'ooo	Previous quarter \$A'ooo
5.1	Cash on hand and at bank	12,898	18,651
5.2	Deposits at call	27,667	21,214
5.3	Bank overdraft	-	-
5.4	Other (provide details)	-	-
	Total: cash at end of quarter (item 1.22)	40,565	39,865

<sup>+</sup> See chapter 19 for defined terms.

(Company secretary) Leanne Stevens

# Notes

- The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
