JORC Code – Mardie Salt and SOP Project

The Mardie Project aims to produce salt and SOP from a seawater resource, which is abundant, inexhaustible, readily accessible and has a known and consistent chemical composition. The Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves 2012 Edition ("JORC Code") does not apply to a project of this nature and, accordingly, JORC Ore Reserves and Mineral Resources are not reported.

JORC Code – Iron Valley

SOP²

- Premium fertiliser used on high value crops
- Global market size of ~7Mtpa (annual value of US\$3.5B)

~1Mt additional annual demand over next decade³ – (growing population, changing dietary habits and declining arable land)

¹ Asian forecast demand as reported by Roskill (July 2021); Forecast contestable Asian market demand growth of 29Mtpa by 2030

Mardie Salt & Potash Project

Australian Salt & SOP Landscape

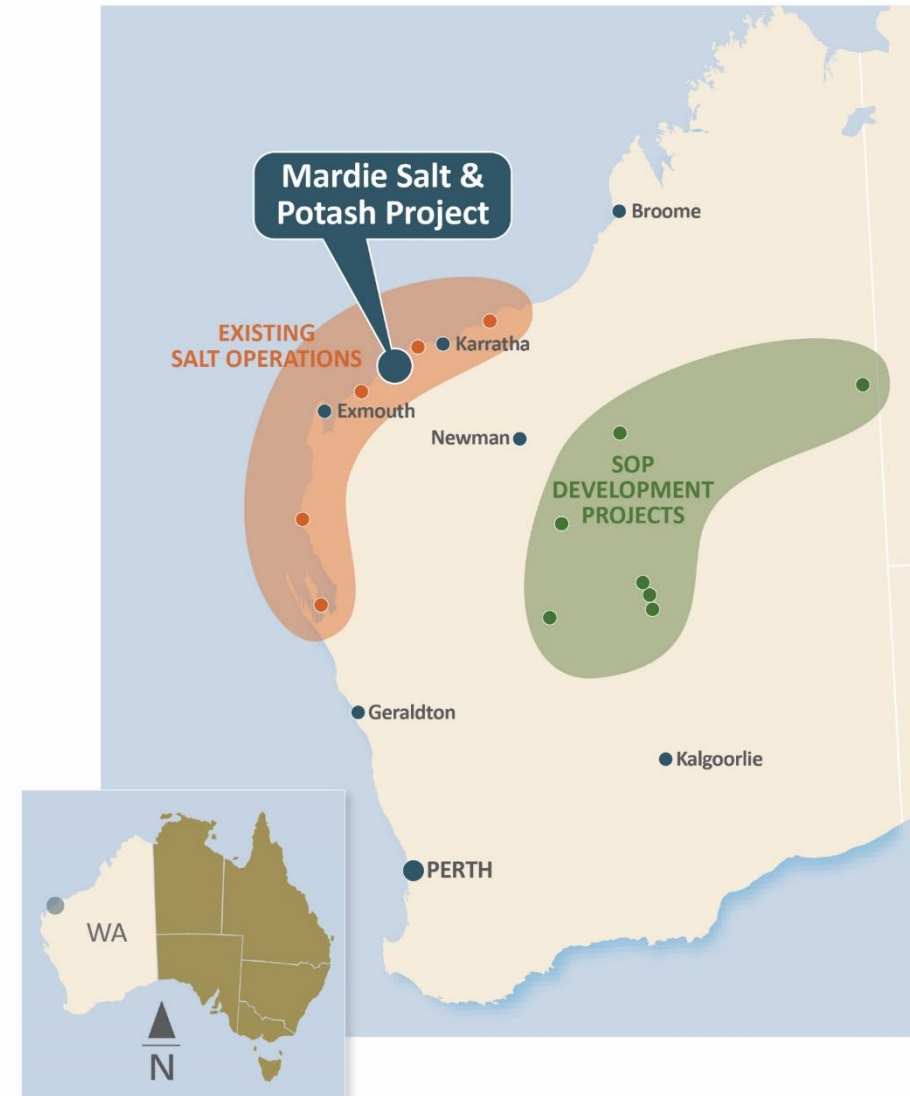

Mardie: ideal location to produce high-purity salt and SOP

- Pilbara has ideal climate to produce high purity salt
 - High temperature, high wind, low rainfall, low humidity
 - Proven salt production region since the 1960's
- Five large WA **Solar Salt Operations** (11-13Mtpa¹)
 - Controlled by Rio Tinto and Mitsui
 - No new large Australian salt project in 20 years

SOP production in Australia in its infancy²:

- Other projects all based on inland lake brines and >700km by road transport to third party ports
- **Mardie Salt and SOP Project:**
 - Only Australian project with commercial salt and SOP from seawater

Salt Cost Curve – Contestable Market

Mardie will be a low-cost supplier of salt into contestable¹ Asian market

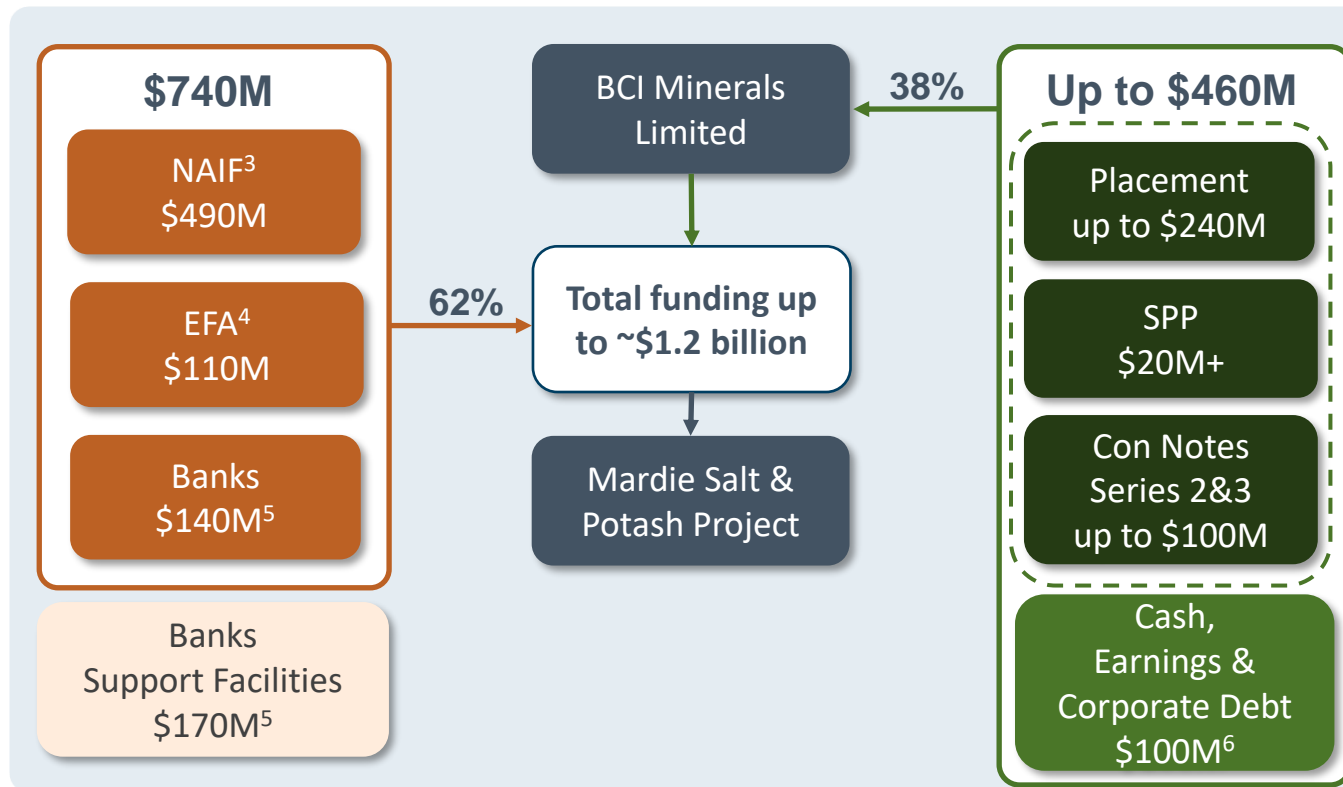

- Mexican solar salt and Chinese rock salt the marginal cost suppliers to most Asian markets (~US\$35/t)
- Mardie will be cost competitive with all Australian salt operations²
- When SOP margin treated as a by-product credit, Mardie becomes one of the lowest cost salt producers

¹Cost curve limited to contestable market where the Mardie project is expected to compete on delivered cost and quality, including coastal China, Japan, Korea, Taiwan and South East Asia ²Roskill (December 2020), BCI analysis

Funding for Development and Ramp-up

Up to \$360M of new equity and Convertible Notes to be issued¹

- Forms part of BCI's \$460M total equity contribution to the Mardie Project, subject to shareholder approvals
- Additional to the recently secured \$740M of Mardie Project debt²
