

RIU Explorers Conference Fremantle, WA

February 2009

Mike Young
Managing Director

Company

- Listed ASX December 2006 Maiden resource March 2008
- Meas & Ind Resource Jan 2009 DFS June 2009
- ➤ Major shareholders → ConsMinerals and Alkane Resources
- Offtake agreement with Tennant Metals

Nullagine Project

- Resource 46Mt @ 57% Fe and low Al2O3 and P
- Feasibility Study underway on 1.5 Mtpa, low Capex startup
- Direct Shipping, high-quality Sinter Blend Ore
- > Expansion through cash flow $1.5 \rightarrow 3.0 \rightarrow +5.0$ Mtpa

BOARD AND MANAGEMENT

www.bciron.com.au

Board Tony Kiernan Chairman (Non-executive)

Mike Young Managing Director

Non-executive Directors

Garth Higgo Business Development

Terry Ransted Consulting Geologist

Steven Chadwick Consulting Metallurgist

Management Simon Storm Company Secretary

Blair Duncan General Manager Operations

Greg Hudson Chief Geologist

Alkane Resources	9.0	15%	
Consolidated Minerals	15.6	26%	
1.75	Number	% Total	

Warrigal Well with 40 m iron ore cliffs in background

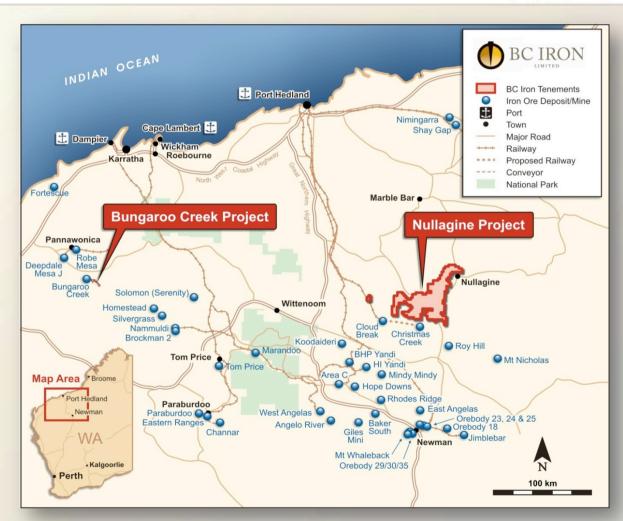

Nullagine Project

- > 1500 km² holding in Pilbara
- Adjacent to existing infrastructure

Bungaroo Creek Project

- > Adjacent Rio's Bungaroo CID
- Greenfields project
- Awaiting grant of tenure

Bonnie Creek CID

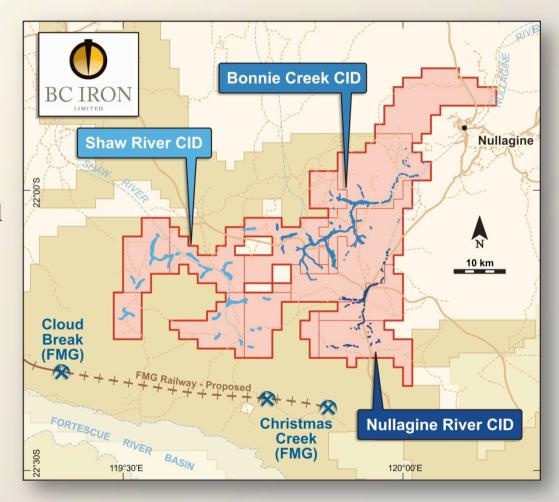

- > 46Mt DSO 57.0% Fe (64% CaFe)
- > 60 Mt DSO 56.0% Fe present
- > Ultra-low P, High quality sinter blend
- Adjacent to FMG operations

Nullagine River CID

DSO & upgrade CID (~5 Mt)

Shaw River CID

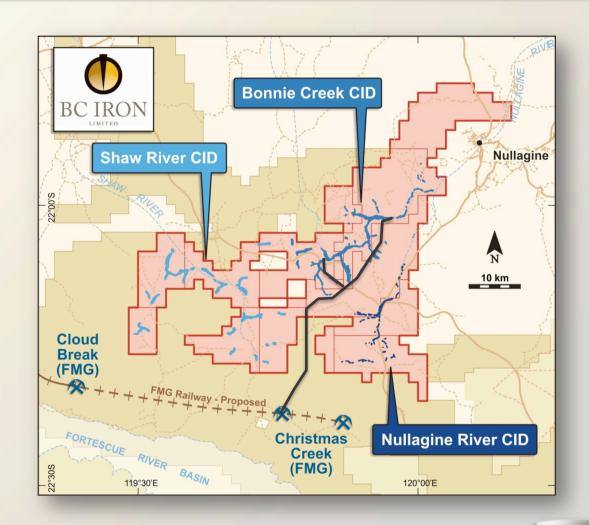

Potential DSO, upgrade & detritals

Bonnie Creek Project

- Startup/Ramp up 1.5/3/5 Mtpa
- CapEx A\$30-40M
- > OpEx ~\$40/tonne FOB
- Very low strip ratio ore at surface
- > Terrain leveller surface miner
- In-pit secondary crushing
- Road haul to Christmas Creek/Cloudbreak
- Expand capacity from cash flows

Total Mineral Resource Estimate – January 2009

DSO Resource Estimate

Class	Mt	Fe	CaFe	SiO_2	Al_2O_3	P	S	LOI ₁₀₀₀

BCI Resource Estimate Jan 2009 FMG, RIO and BHP data from corporate websites

BONNIE CREEK CID – Outcamp Prospect

www.bciron.com.au

Outcamp-Warrigal

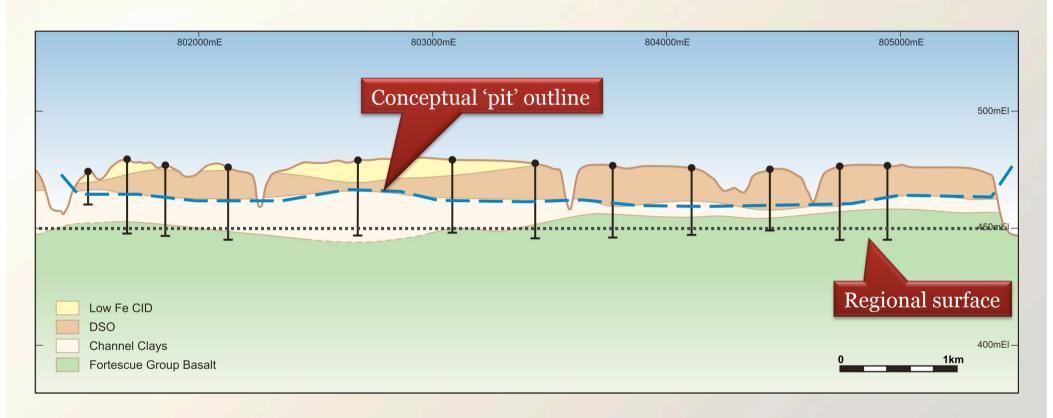

- > 38 Mt at 57.0% Fe (64.7% CaFe)
- Low strip ratio
- > Outcropping mineralisation

BONNIE CREEK CID – Outcamp Prospect

www.bciron.com.au

- ➤ Shallow "pits" mainly above surrounding plains mining ore from day 1
- ➤ Above water table lower environmental impact
- ➤ Low OpEx low strip ratio, use of surface miners

BONNIE CREEK CID – Warrigal Well

www.bciron.com.au

- > Ore body at top of hills, no mining below surface
- >Accessible by 4 WD along length of ore bodies
- ➤ Simple surface mining, very low strip ratios

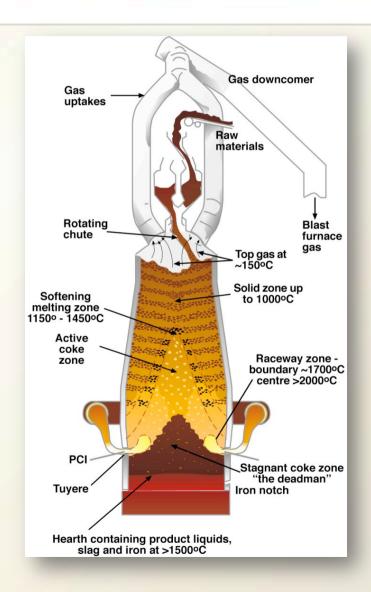

VERMEER TL1255 Terrain Leveller

- Drill & Blast not required
- Primary Crushing not required
- Mine Haul Trucks not required

VERMEER TL1255 operating at Cloud Break (FMG) – photo by BC Iron

Blast furnace

- Iron ore & coal are added at the top in alternating layers – lump & coke only
- Hot air is blasted into the bottom of the furnace
- Rising gases provide environment for reducing the iron oxides – Fe₂O₃ → FeO
- Descending burden melts to create iron metal
- High Al₂O₃, SiO₂ affect furnace efficiency
- High S and P affect the steel quality

Sintering

- ➤ All iron ore mines produce a lump (6 30 mm) and a fines (< 6 mm) product</p>
- Only lump ore can be used in the blast furnace
- Synthetic lump is made by from fines by high temperature agglomeration - sintering
- Optimal physical properties of the sinter:
 - > Strength, granularity, Fe content, reducibility
- Optimal sintering efficiency
 - > Productivity, yield, assimilation

Sintering Qualities of BCI Ore

- ➤ Independently tested in China Shandong Uni
- Blended with a typical fines sinter feed
- Using 0, 10, 20, and 30% blend
- Resulted in increased quantity and quality of sinter"First Class"
- > Test work results:
 - Increased sinter yield
 - Improved sintering time
 - Improved tumble Index (strength)
 - Improved productivity
- Ultra-low Phosphorus (0.016%)
- Sample tested 55.4% Fe & 2.4 % Al2O3

Infrastructure Strategies

- ➤ Rail Haulage with FMG/TPI
 - Port access via TPI Anderson Point 2009
 - Port access via Utah Point facility 2010
 - Port access via planned NWIOA facility 2012
- Rail Access under TPI State Agreement using contract haulage by a rail company on TPI railway
 - Port access via Utah Point facility 2010
 - Port access via planned NWIOA facility 2012

Fortescue ore train – photo by BC Iron

Marketing Offtake

- Offtake agreement with Tennant Metals
 - 25% Offtake to Tennant as Principal or Agent
 - Mechanisms for increased offtake
 - Australian company Australian bank payments
- BC Iron Ore Marketing Strategy
 - Sinter blend value add product
 - Ultra-low P "like gold" blend Indian/Chinese ores
 - Develop Long Term Contracts with niche mills
 - Quantity at quality for longer

SUPPORTING STATEMENT

www.bciron.com.au

This release may include forward-looking statements. These forward-looking statements are based on management's expectations and beliefs concerning future events. Forward-looking statements are necessarily subject to risks, uncertainties and other factors, some of which are outside the control of BC Iron Limited, that could cause actual results to differ materially from such statements. BC Iron Limited makes no undertaking to subsequently update or revise the forward-looking statements made in this release to reflect events or circumstances after the date of this release.

The information relating to the terms "iron ore", "exploration target", "direct shipping ore", "conceptual pits" and "upgrade" should not be misunderstood or misconstrued as an estimate of Mineral Resources and Reserves as defined by the JORC Code (2004) and therefore the terms have not been used in this context. It is uncertain if further exploration or feasibility study will result in the determination of a Mineral Resource or Mining Reserve.

The information that relates to the drilling data and geological interpretations is based on information compiled by Michael Young who is a Member of The Australian Institute of Geoscientists and a Director of the Company. The information that relates to the Mineral Resource Estimate has been compiled by Mr Richard Gaze who is a member of the Australasian Institute of Mining and Metallurgy and an employee of Golder Associates. Both Mr Young and Mr Gaze have sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity that they are undertaking to qualify as a Competent Persons as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Gaze and Mr Young consent to the inclusion in their names in the matters based on their information in the form and context in which it appears.

You should not act and refrain from acting in reliance on this presentation material. This overview of BC Iron does not purport to be all inclusive or to contain all information which its recipients may require in order to make an informed assessment of the Company's prospects. You should conduct your own investigation and perform your own analysis in order to satisfy yourself as to the accuracy and completeness of the information, statements and opinions contained in this presentation and making any investment decision.

The information contained herein is general in nature and does not constitute financial product advice. If necessary, you should seek specific financial advice of your stockbroker prior to making any investment decision. This presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any investor.
