Clean TeQ Sunrise Project – Modification 6 Approval

Melbourne, Australia – Mr Sam Riggall, CEO of Clean TeQ Holdings Limited (**Clean TeQ** or the **Company**) (ASX/TSX:CLQ; CTEQF:OTCQX) is pleased to advise that the New South Wales Department of Planning and Environment (**DPE**) has formally approved Modification 6 to the Development Consent for the Clean TeQ Sunrise Project (**Project**). The approval is an important milestone as planning and execution of the Project's early works progresses.

Clean TeQ submitted Modification 6 in January 2018 seeking changes to the accommodation facility at the Project which were deemed necessary to both optimise the mine plan and improve the amenity of the on-site workforce. The changes included the relocation of the accommodation facility from the main mine site to an adjacent property south of the mine on a property owned by Clean TeQ called "Sunrise" (see Figure 1).

Approval of Modification 6 will also allow Clean TeQ to use the camp for up to approximately 300 personnel during site-based campaigns such as shutdowns and maintenance. In addition, the Modification permits an increase in the camp's capacity from approximately 1,000 to 1,300 personnel during the construction phase.
