Clean TeQ hosts delegation of senior Members of Parliament at Sunrise Project

MELBOURNE, Australia – Clean TeQ Holdings Limited (**Clean TeQ** or the **Company**) (ASX/TSX:CLQ; CTEQF:OTCQX) was delighted to host a delegation of senior Members of Parliament at the Clean TeQ Sunrise Project earlier this week including the Australian Deputy Prime Minister and the Commonwealth Minister for Resources and Northern Australia. The tour follows the recent completion of the Definitive Feasibility Study, which highlighted the global significance of the Clean TeQ Sunrise Project and its ability to generate substantial economic returns for shareholders as well as communities in the Central West region of New South Wales.

The site tour was attended by Senator the Hon. Matthew Canavan, Minister for Resources & Northern Australia, the Hon. Michael McCormack MP, Deputy Prime Minister and Member for Riverina, and the Hon. Mark Coulton MP, Member for Parkes, as well as the Mayors of the Shires of Lachlan, Parkes and Forbes.

Clean TeQ's Chief Executive Officer Sam Riggall used the valuable opportunity to provide an update on the Company's development strategy, the mine plan and processing technology, and highlighted the Project's critical role in producing the strategic metals – nickel sulphate, cobalt sulphate and scandium – required to supply the lithium ion battery and light weight alloy markets. The briefing also highlighted the significant benefits the Project will generate for local communities in the form of infrastructure upgrades, local employment opportunities, royalties and taxes.

The Hon. Michael McCormack MP, Deputy Prime Minister, said the Project was of international significance. *“This project will firmly establish Australia as a reliable and high-grade supplier of materials that will help drive the ever-increasing number of electric cars on roads around the world,”* he said.

The Hon. Mark Coulton MP said the Project will also provide a jobs boost to the region. *“At its peak this project is expected to employ a construction workforce of around 1,000 people and an ongoing workforce of 300 people. Local businesses will also benefit as suppliers of goods and services,”* Mr Coulton said.

Clean TeQ’s Chief Executive Officer, Sam Riggall, commented: *“Clean TeQ Sunrise will be a modern and sustainable mining operation, producing raw materials which are critical to the clean energy revolution. We greatly appreciated the opportunity to invite key members of parliament to site to explain our vision for the Project and highlight the exceptional economic and community benefits the development of this world-class asset will deliver.”*
