COMPANY ENQUIRIES Pauline Collinson COMPANY SECRETARY

TANAMI GOLD NL ABN 51 000 617 176 T: +61 8 9212 5999 F: +61 8 9388 7559 Unit B1, 431 Roberts Road, Subiaco Western Australia 6008 PO BOX 1892, West Perth Western Australia 6872

MARCH 2019

CORPORTATE

Cash and Cash Equivalents

As at 31 March 2019, the Company had available cash of \$28,265,765.

Northern Star Resources Limited Shares ("NST")

As at 31 March 2019, the Company has 500,000 NST shares remaining.

Update on Central Tanami Project ("CTP") and Completion of Exercise of First Put Option

The Company previously announced that it had exercised the first put option available to it under the Joint Venture Agreement with NST which was settled on 14 September 2018, resulting in the sale of a further 15% undivided interest in the CTP for \$20 million in cash. The respective interests in the CTP of the Company and NST at the date of this report are 60% and 40%.

EXPLORATION

Central Tanami Project (60% Tanami)

NST have advised that the March quarter of 2019 has seen the re-commencement of on-ground exploration programs across several CTP prospect areas.

Reconnaissance and follow-up air core drilling commenced late in the quarter with a planned program of ~22,000m for 426 holes, scheduled for completion by late May 2019. Other significant exploration programs include geophysical acquisition and surface geological mapping in the Groundrush Domain region and ongoing geological interpretation of key deposits within the mine corridor, including Hurricane-Repulse and Jims.

Air core drilling:

Air core (AC) drilling commenced late in the quarter, following the cessation of monsoonal weather. Drilling commenced on 21 March 2019 with a total of 67 holes for 3,775m being completed by the end of the quarter.

37 AC holes for 2,809m were completed at the Solaris Prospect as a follow-up to significant intercepts from 2018 AC drilling. Drilling was focussed on testing the extent of significant mineralisation previously intersected which included 5m @ 4.84 g/t gold, 6m @ 1.12 g/t gold and 1m @ 9.01g/t gold. Mineralisation was interpreted to be a planar zone dipping moderately towards the south west and was intersected over a total strike length of ~120m.

AC drilling commenced at Groundrush West on 29 March 2019 with 30 holes being drilled for 966m and a further 96 holes planned for the Groundrush West prospect. Drilling is ongoing at the end of the quarter.

Gravity survey:

A ground-based gravity survey was planned late in the quarter, with Atlas Geophysics awarded the contract to complete the data acquisition. The survey is broken into four main zones and is entirely focussed on the Groundrush Domain. The survey is scheduled to commence data acquisition in early-April.

Geological review:

A geological review was completed for the Groundrush domain to provide a basis for ongoing exploration programs in the region. This review included a prospectivity study, geochemical analysis and structural-geological interpretation. From the review, five areas of interest were confirmed, these are Sky Surf, Base Jump, Dropzone, Jing Shan and Tandem. With reconnaissance drilling and surface geological reconnaissance already underway at Dropzone and Sky Surf, additional exploration programs and field reconnaissance will be conducted in the coming quarter to develop concurrent exploration programs in this area.

Planned work for next quarter:

- Ongoing AC drilling
 - Groundrush West 96 holes
 - Freefall 66 holes
 - Dropzone 72 holes
 - Farrands Hill 152 holes
- Cave Hill AC site preparation/earthworks
- 2019 Exploration MMP drafting and submission
- Groundrush Domain ground gravity survey acquisition, processing and interpretation
- Groundrush Domain surface geological mapping and reconnaissance
- Review current AC drilling results (Solaris, Groundrush West)
- Ongoing Access Agreement negotiations

MINERAL RESOURCES

Table 1: Tanami Gold NL Mineral Resources as at 31 March 2019 (60% Tanami)

						Resource	Category					
Project	l	Measured			Indicated			Inferred			Total	
Project	Tonnes	Grade	Ounces	Tonnes	Grade	Ounces	Grade		Ounces	Tonnes	Grade	0
	Tonnes	g/t Au	Ounces	Tonnes	g/t Au	Ounces	Tonnes	g/t Au	Ounces	ronnes	g/t Au Ounces	Ounces
CTP ⁹	6,255,000	2.9	579,000	11,075,000	2.8	1,001,000	12,106,000	2.9	1,133,000	29,436,000	2.9	2,713,000
CTP Stockpile ⁹	1,400,000	0.7	31,000	-	-	-	-	-	-	1,400,000	0.7	31,000
Total	7,655,000	2.5	610,000	11,075,000	2.8	1,001,000	12,106,000	2.9	1,133,000	30,836,000	2.8	2,744,000

Notes to accompany Table 1

1. CTP is Central Tanami Project.

- 2. Resource estimations completed using MineMap, Vulcan, Surpac, Datamne and Micromine software packages comprising a combination of ellipsoidal inverse distance and ordinary kriging grade interpolation methods.
- 3. Variable gold assay top cuts were applied based on geostatistical parameters and historical production reconciliation.
- 4. Resources reported above relevant cut-offs based on economic extractions, varying between 0.7g/t Au and 5.0g/t Au block model grade.
- 5. Stockpile figures from previously reported Otter Gold Mines NL 2001 Mineral Resource estimate less recorded treatment by Newmont Asia Pacific.
- 6. Tonnes and ounces rounded to the nearest thousand and grade rounded to 0.1g/t Au. Rounding may affect tallies.
- 7. The information in this report pertaining to Mineral Resources was compiled by Mr Bill Makar (MAusIMM), former Consultant Geologist Tanami Gold NL, Mr Michael Thomson (MAusIMM), former Principal Geologist for Tanami Gold NL, Mr Steven Nicholls (MAIG), former Senior Geologist for Tanami Gold NL, Mrs Claire Hillyard (MAusIMM), former Resource Geologist for Tanami Gold NL, Mr Mark Drabble (MAusIMM) Principal Consultant Geologist, Optiro Pty Ltd and Mr Peter Ball (MAusIMM), Director of Datageo Geological Consultants, and Mr Brook Ekers, a Competent Person who is a Member of the Australian Institute of Geoscientists and a full-time employee of Northern Star Resources Limited. Mr Makar, Mr Thomson, Mr Nicholls, Mrs Hillyard, Mr Drabble, Mr Ball and Mr Ekers have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as Competent Persons as defined in the 2012 edition of the Australiasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). Mr Makar, Mr Thomson, Mr Nicholls, Mrs Hillyard, Mr Drabble, Mr Ball and Mr Ekers consent to the inclusion in this report of the matters based on their information in the form and context in which it appears.
- The dates referred to in this table represents the date of the most resent update of a Resource (ML22934 Groundrush) within this table, all other Mineral Resources except for ML22934 Groundrush remain unchanged.
- 9. On 4th of August 2015, an unincorporated joint venture ("JV") was formed between the Company and Northern Star Resources Limited who purchased an initial 25% interest in the Company's CTP. On 14 September 2018, the Company exercised the first put option available to it under the JV to sell a further 15% in the CTP. As at 31 March 2018, the Company retains a 60% interest in the CTP Resources stated in this table.

Notes to accompany Table 2

- 1. Resource estimations completed using MineMap, Vulcan and Micromine software packages comprising a combination of ellipsoidal inverse distance and ordinary kriging grade interpolation methods.
- 2. Grade estimation was constrained to material within >0.7g/t mineralisation outlines.
- 3. Variable gold assay top cuts were applied based on geostatistical parameters and historical production reconciliation.
- 4. Resources reported above 0.7g/t block model grade.
- 5. Resources reported above 1.0g/t block model grade.
- 6. Stockpile figures from previously reported Otter Gold Mines NL 2001 Mineral Resource estimate less recorded treatment by Newmont Asia Pacific.
- 7. Tonnes and ounces rounded to the nearest thousand and grade rounded to 0.1g/t. Rounding may affect tallies.
- 8. The information in this report pertaining to Mineral Resources for the Central Tanami Project (excluding ML22934 Groundrush) was compiled by Mr Bill Makar (MAusIMM), former Consultant Geologist Tanami Gold NL, Mr Michael Thomson (MAusIMM), former Principal Geologist for Tanami Gold NL, Mr Steven Nicholls (MAIG), former Senior Geologist for Tanami Gold NL, Mrs Claire Hillyard (MAusIMM), former Resource Geologist for Tanami Gold NL and Mr Peter Ball (MAusIMM), Director of Datageo Geological Consultants. Mr Makar, Mr Thomson, Mr Nicholls, Mrs Hillyard and Mr Ball have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as Competent Persons as defined in the December 2004 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). Mr Makar, Mr Nicholls, Mrs Hillyard and Mr Ball consent to the inclusion in this report of the matters based on their information in the form and context in which it appears.
- 9. ML22934 Resource consists of two Resources Groundrush Deposit (10.7million tonnes at 3.3g/t for 1,129,000 ounces of gold) and the Ripcord Deposit (1.1 Million tonnes at 2.5g/t for 89,000oz). The information in this report pertaining to Mineral Resources for ML22934 Groundrush was compiled by Mr Brook Ekers, a Competent Person who is a Member of the Australian Institute of Geoscientists and a full-time employee of Northern Star Resources Limited. Mr Ekers has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as Competent Persons as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). Mr Ekers consents to the inclusion in the public report of the matters based on this information in the form and context in which it appears.
- 10. The dates referred to in this table represents the date of the most recent update of a Resource (ML22934 Groundrush) within this table, all other Mineral Resources except for ML22934 Groundrush remain unchanged.

ESTIMATION GOVERNANCE STATEMENT

The Company ensures that all Mineral Resource calculations are subject to appropriate levels of governance and internal controls.

Exploration results are collected and managed by an independent competent qualified geologist. All data collection activities are conducted to industry standards based on a framework of quality assurance and quality control protocols covering all aspects of sample collection, topographical and geophysical surveys, drilling, sample preparation, physical and chemical analysis and data and sample management.

Mineral Resource estimates are prepared by qualified independent Competent Persons. If there is a material change in the estimate of a Mineral Resource, the estimate and supporting documentation in question is reviewed by a suitable qualified independent Competent Persons.

The Company reports its Mineral Resources on an annual basis in accordance with JORC Code 2004 and 2012.

COMPETENT PERSON'S STATEMENT

The information in this report that relates to all Mineral Resources (other than ML22934 Groundrush) is based on information compiled by consultant geologist Mr Michael Thomson of MiGeo Enterprise Pty Ltd. Mr Thomson is a member of the Australasian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the December 2004 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). Mr Thomson consents to the inclusion in this report of the matters based on his information in the form and context in which they appear. This information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported.

The information in this report that relates to the Mineral Resource for ML22934 Groundrush is based on information compiled Mr Brook Ekers, a Competent Person who is a full-time employee of Northern Star Resources Limited. Mr Ekers is a member of the Australian Institute of Geoscientists and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code). Mr Ekers consents to the inclusion in this report of the matters based on his information in the form and context in which they appear.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Signed: Daniel Broughton Chief Financial Officer

Date: 30 April 2019

Notes

- 1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
- 2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
