ASX ANNOUNCEMENT

High Grade Gold and Silver Assays, Ashburton, Western Australia

Cullen Resources Limited (Cullen) is pleased to announce high-grade gold and silver assays from rock chip sampling carried out by U3O8 Limited (U3O8) on the Saltwater Pool Joint Venture area in the Ashburton District of Western Australia (see Figure). U3O8 signed the Saltwater Pool Joint Venture Agreement with Thundelarra Exploration (Thundelarra) on three tenements in the Ashburton area of Western Australia on 31st March 2011, two of which are held by Cullen (E52/1890 and E52/1892). U3O8 and Thundelarra can together earn 70%, with Cullen to retain 30% in these two tenements.

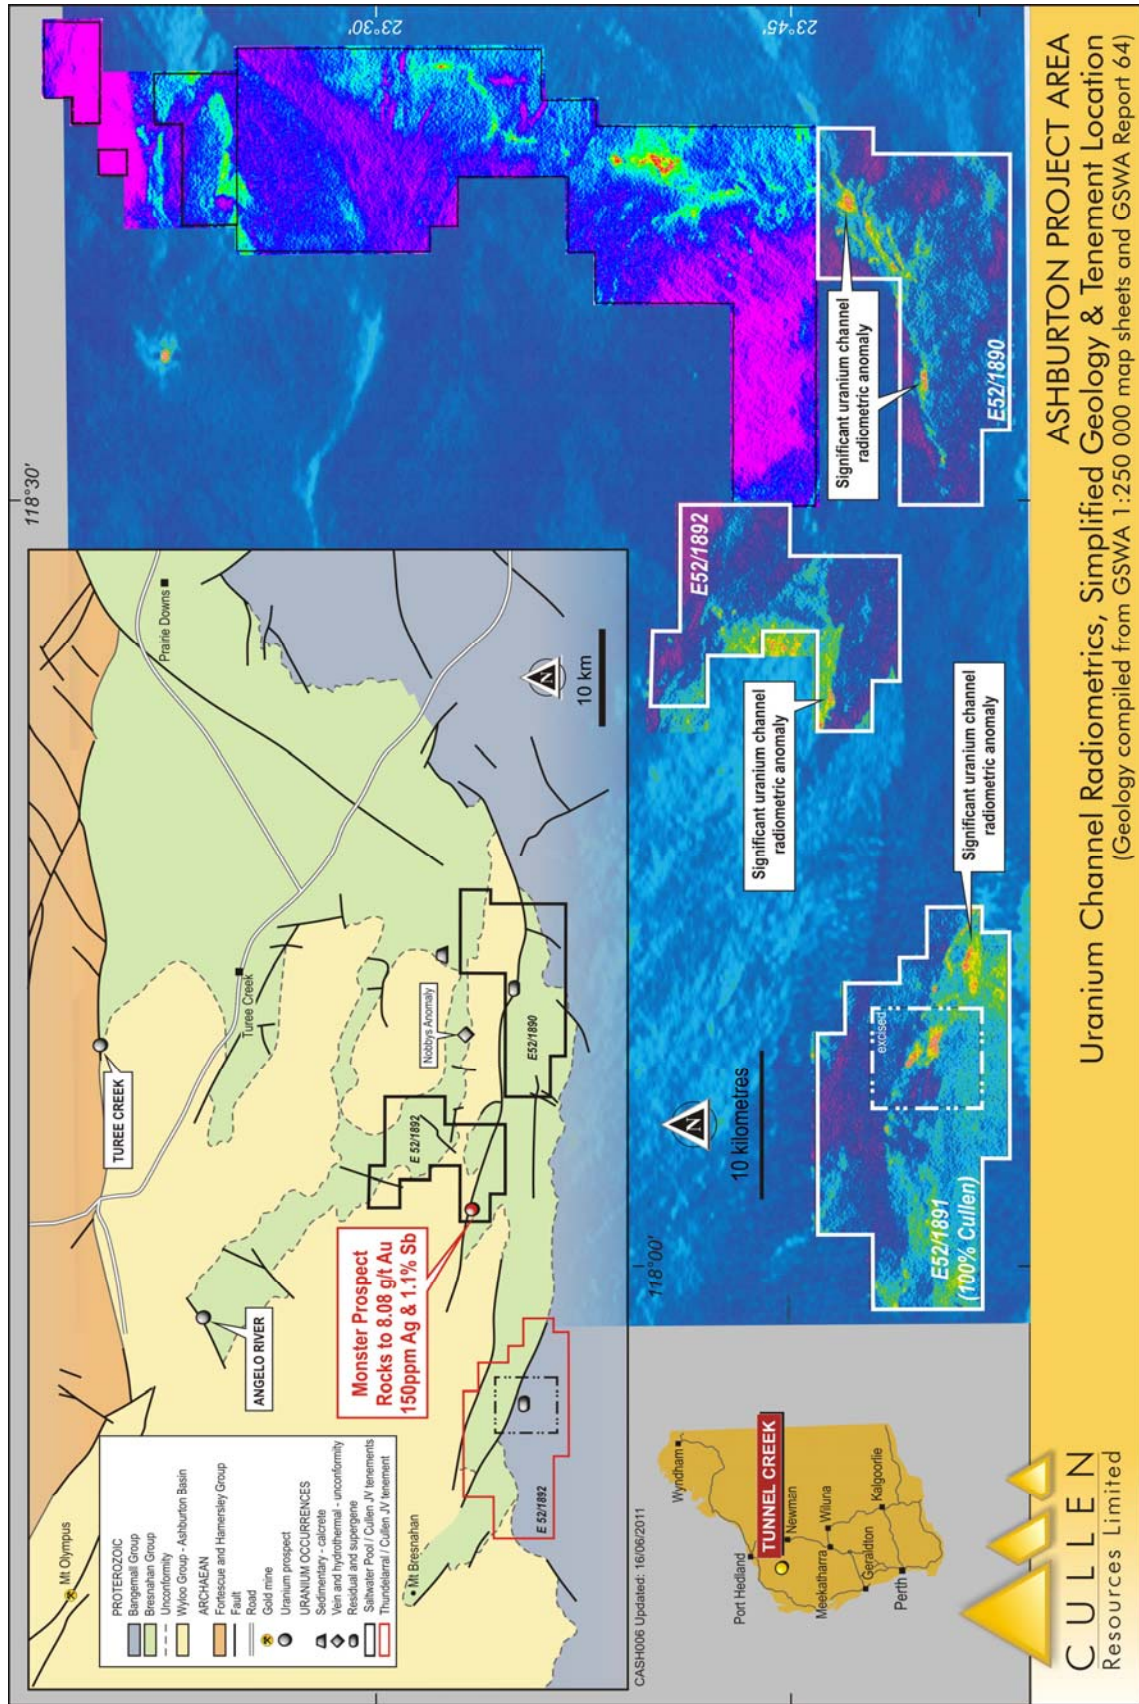

Rock chip sampling from the Monster Prospect on E52/1892 in the Saltwater Pool JV area has returned up to **8.8g/t gold (Au), 150g/t silver (Ag) and 1.1% antimony (Sb)**.

Samples from the Monster Prospect are from a complex, brecciated quartz vein system and were collected from a small area over various parts of the veins. A total of 22 samples returned between 1.0 and 150g/t Ag, whilst 10 samples returned between 0.1g/t and 8.08g/t Au.

Follow up sampling is proposed at the Monster prospect and along strike. To date, the sampling has been limited due to access difficulties and available time. A review of radiometrics, electromagnetics and satellite imagery is on-going. This will be followed by a detailed follow up sampling and geological mapping programme.
