

## FIRST TRANCHE OF HAYES CREEK SETTLEMENT RECEIVED

Thundelarra is pleased to announce that the first tranche of the settlement consideration for the sale of the Company's Hayes Creek uranium interests has been received.

The Company received advice late yesterday that the \$650,000 had been released from the trust account and credited to Thundelarra's cash management account. This follows receipt of formal advice from the Mineral Titles Division of the Northern Territory's Department of Minerals and Energy that the relevant licences had been transferred and registered in the buyer's name.

The remaining \$900,000 of the sale consideration is payable by 31 July 2015, either in shares in the buyer's parent if that entity chooses to list on a recognised Stock Exchange before then, or in cash if a listing does not eventuate by then.

The receipt of these funds allows Thundelarra to continue to advance the exciting exploration program currently underway at its 90%-owned Red Bore prospect (M52/597) in Western Australia's Doolgunna region.
