

## ASX Announcement

---

### Update regarding COVID-19

**30 March 2020**

Energy Resources of Australia (**ERA**) acknowledges the recently implemented Biosecurity (Human Biosecurity Emergency) (Human Coronavirus with Pandemic Potential) (Emergency Requirements for Remote Communities) Determination 2020 (**Determination**), issued pursuant to the emergency powers provided by the Commonwealth Government under the Biosecurity Act 2015, to protect some of our most vulnerable Australians as part of a broad program of measures to prevent the spread of coronavirus (**COVID-19**).

The designated remote Local Government Areas covered by the Determination access restrictions include the Ranger mine operation area.

ERA's greatest priority is the health and safety of our people and the health and safety of the communities in which we operate.

ERA is currently working through the implementation of additional controls and protocols to fully comply with all Government requirements in order to protect our people and local communities as our first priority. This involves extensive consultation with regulators, health authorities and local community stakeholders. At the same time, ERA continues to assess the impact of these controls on its ability to maintain a level of operational capability and progress its rehabilitation program throughout this time. ERA has placed a temporary suspension on in-bound workers from Darwin to Ranger until further measures have been implemented to ensure the requirements of the Determination can be fully met. This is likely to take several days.

ERA takes its responsibilities in this regard very seriously and will update the market on implications for its people, communities and business as these controls are implemented.

This announcement is authorised by the Disclosure Committee.

**ERA**

### **About Energy Resources of Australia Ltd**

Energy Resources of Australia Ltd (**ERA**) operates the Ranger mine, Australia's longest continually operating uranium mine.

Together, ERA provides clean energy to the world and cares for people and country.

ERA has an excellent track record of reliably supplying customers. Uranium oxide has been produced at Ranger for more than 35 years. During that time, Ranger has produced in excess of 130,000 tonnes of uranium oxide.

ERA's Ranger mine (100%) is located eight kilometres east of Jabiru and 260 kilometres east of Darwin, in Australia's Northern Territory. ERA also holds title to the Jabiluka Mineral Lease (100%). ERA is a major employer in the Northern Territory and the Alligator Rivers Region.
