## ASX Announcement

### Mineral Resources becomes a Substantial Shareholder in Goldstar Resources

Mineral Resources Limited (ASX: MIN) has accepted a placement of 7,189,241 shares (to supplement an existing small shareholding) to become a substantial shareholder in Goldstar Resources NL. The funds will be used by Goldstar Resources to continue work on the Tubal Cain/ Eureka Feasibility Study at the Walhalla Gold Project in Victoria with the intention to fast track the production start up following successful exploration outcomes.

Mineral Resources will work with Goldstar to explore for synergies between the two groups as Goldstar moves towards production in the shortest possible time and also take advantage of the current strength in the gold market.

“Goldstar Resources has the opportunity to develop into a successful mid-tier gold production company within a short development period,” said Peter Wade, Managing Director of Mineral Resources.

“We are looking forward to working with the current management and technical team at Goldstar as they finalise the project feasibility study and move into the engineering and development phases of the process and production operation.”

Mineral Resources has a long history of establishing BOO crushing and processing circuits at gold operations in Western Australia, the Northern Territory and in West Africa and sees significant benefits in working with Goldstar as a substantial shareholder to optimise the development of the Walhalla Gold Project.

---

*Mineral Resources Limited and is a leading, integrated, Australian based mining services and processing company with operations in contract crushing, general mine services, infrastructure provision and recovery of base metal concentrate for export. Operations are supplemented by rehabilitation and sale of heavy duty crushing and processing equipment, hire of engineering and crushing fleet plant and workshop manufacture of polyethylene pipe fittings and components.*
