Dear Sir,

## Company Update Letter to Shareholders

Please find attached a company update letter for Resonance Health Limited (ASX:RHT) which was distributed to Shareholders today.

Yours sincerely,

Stuart Usher  
**Joint Company Secretary**

25 November 2004

Dear Shareholder,

We are delighted to inform you of exciting progress and the successful completion of a number of key milestones that will support the acceleration of our global implementation of the FerriScan™ technology.

**TGA to list FerriScan™, which will also provide CE Mark and access to Europe**

The FerriScan™ test for non-invasive measurement of iron overload is poised for commercial launch following confirmation of listing on the Australian Register of Therapeutic Goods (ARTG) by the Therapeutic Goods Administration (TGA). Registration of FerriScan™ in European markets with CE Mark certification will follow TGA listing as a result of reciprocal arrangements between the TGA and European authorities. The material prepared for the TGA in Australia will form the basis of a US FDA 510(k) regulatory submission for FerriScan™ for filing within 28 days. A copy of the announcement to the Australian Stock Exchange on this important milestone for FerriScan™ is attached.

**Commercial Partner Identified for FerriScan™ Pilot Commercial Launch in Australia**

Resonance Health, its subsidiary Inner Vision Biometrics (IVB), and a major group of Australian radiology practices have signed a Memorandum of Understanding (MOU) to launch a commercial pilot of FerriScan™ in Australia. Based on the experience gained in the pilot, a second stage full Australian commercial roll-out is included in the MOU. Confidentiality provisions in the MOU preclude Resonance Health from providing further information about the group of radiology practices concerned.

I look forward to keeping you informed of further developments as they occur.

Yours truly,

Tony Fitzgerald  
**Executive Director**
