Company Announcements
Australian Stock Exchange
4th Floor, 20 Bridge Street
Sydney NSW 2000

Dear Sir/Madam,

RHT: Update on FerriScan®

Further to our announcement of 15 February 2007, the Company is pleased to advise that the previously announced arrangement with our largest customer for minimum monthly revenues of US\$100,000, derived from the Company's non-invasive tool for the measurement of liver iron concentration, FerriScan®, has been extended through June 30 pending further negotiations.

The Company expects to continue to receive revenues at some level from that customer even if the contract is renegotiated, and will provide further notice when there is additional clarity about material changes in the contract.

By Order of the Board

Paul Jobbins
Company Secretary
