

**ASX Release**

27 July 2015

### **Entrepreneur of the Year Award**

Resonance Health is pleased to announce that Chief Scientific Officer, Professor Tim St Pierre has won the Western Region EY Entrepreneur of the Year™ (Technology) award. Professor St Pierre will now go on to compete for the national award in Sydney in October. The overall winner will then travel on to Monaco in June 2016 to represent Australia in the global final of the EY Entrepreneur Of The Year™ program.

The program recognises the potential of people who inspire others with their vision, leadership and achievement and aims to celebrate those who are building and leading successful, growing and dynamic businesses.

Professor St Pierre led the development of FerriScan®, an MRI-based technology to measure liver iron. FerriScan is now available in over 30 countries worldwide and nearly 30,000 patient scans have been performed to date. In 2014 Professor St Pierre accepted the 'Innovator of the Year' Award on behalf of Resonance Health, for the development of the Company's latest product, HepaFat-Scan®

The HepaFat-Scan technology is now being made available worldwide by Resonance Health. This new MRI-based technology measures the proportion of fat in a patient's liver, an indicator for Non-Alcoholic Fatty Liver Disease (NAFLD) and possible precursor to Non-Alcoholic Steatohepatitis (NASH). Prevalence of these conditions is increasing exponentially in first world countries due to the obesity epidemic. The accuracy of HepaFat-Scan will also have utility in assisting pharmaceutical companies develop treatments for these conditions.

Professor St Pierre said "I am thrilled to have been able to work with my colleagues to develop and commercialise world-leading technologies to better the health and lives of people worldwide, and to demonstrate on a global stage the capabilities of Resonance Health."
