

30 October 2026

September 2026 Quarterly Activities Report

Highlights

- WhiteRock listed on ASX in August 2026 after raising A\$6.0 million (before costs) at A\$3.25 per CDI.
- 2026 drilling program at Spodumene Mountain began in July, concluding in October, and was completed safely and on plan: 65 holes for 19,481 metres, with pegmatite intersected in every hole.
- Announced drilling results have more than doubled the known strike length at Spodumene Mountain to 1.4 km, with visual logging¹ of 17 holes identifying spodumene-bearing pegmatite in every hole.
- Subsequent to the Quarter, assay results for the first 17 holes confirmed thick, high-grade intercepts, including 84.0 m at 1.84% Li₂O from 8.0 m (BL26-041) and 37.9 m at 2.47% Li₂O from 152.9 m (BL26-045).
- Subject to assay results, data from the drilling program is expected to support a maiden Mineral Resource Estimate for Spodumene Mountain in H1 2027.
- Cash of C\$24.8 million at 30 September 2026.

¹Cautionary Note: Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations.

WhiteRock Lithium Corp. (ASX: WLC) ("**WhiteRock**" or "**Company**") provides its activities report for the quarter ended 30 September 2026 (the "**Quarter**"). All amounts are in Canadian dollars unless stated otherwise.

Simon Hay, Chairman and Chief Executive Officer of WhiteRock Lithium, said:

"The September quarter was an important period for WhiteRock, marked by our successful ASX listing and strong progress at the Banana Lithium Project. Through improved operational performance, drilling rates increased progressively during the quarter, enabling us to complete 50 holes for 14,805 metres by 30 September and the full 19,481-metre program safely and on plan in October.

"Importantly, drilling results announced so far have more than doubled the known strike length at Spodumene Mountain from approximately 650 metres to 1.4 kilometres, with the system remaining open along strike and down dip. This reinforces the scale of the opportunity we are evaluating at Spodumene Mountain. Our focus is now on completing core processing, receiving and validating assay results, and advancing the geological work required to support our target of a maiden Mineral Resource Estimate for Spodumene Mountain in H1 2027, subject to the results of the program."

Banana Lithium Project, Québec (100%)

The Banana Lithium Project ("**Project**") covers 1,360 claims and approximately 67,245 hectares in the Eeyou Istchee James Bay and Nunavik regions of Québec. Work in the Quarter was focused on the 2026 diamond drilling program at

the Spodumene Mountain prospect. Spodumene Mountain is one of a number of pegmatite outcropping prospects within the Project and the first one targeted for further drilling owing to its large-scale, high-grade and shallow nature and generally coarse particle size.

The Project is currently accessed by helicopter. Its southern boundary lies less than 2 km east of a gravel road that connects to the all-season Trans-Taiga Highway, approximately 25km to the south. The 2026 program is run from Camp Coulon, an established nearby exploration camp over which the Company has a rental agreement.

The Project sits within the La Grande Subprovince of the Archean Superior Province. The spodumene-bearing pegmatites are of the lithium-caesium-tantalum (“**LCT**”) type and are hosted by mafic to ultramafic rocks of the Gayot Complex. Spodumene is the main lithium mineral and occurs mostly as coarse crystals, from centimetres to decimetres in size, within the Spodumene Mountain prospect.

WhiteRock staked the Project in 2022 and discovered the Banana Lithium Project pegmatite in 2023. The Company's first drilling program, in 2024, completed 29 diamond holes for 7,844 m at Spodumene Mountain, Isabella, Marine and Roloh prospects, and every hole intersected lithium-mineralised pegmatite.

The Project hosts an Exploration Target of 190–275 Mt at 1.2–1.6% Li₂O across the Spodumene Mountain, Isabella and Marine prospects. Spodumene Mountain hosts 70–100 Mt of the Exploration Target at 1.2–1.6% Li₂O. The Exploration Target is set out in the Prospectus dated 30 June 2026. The potential quantity and grade of the Exploration Target is conceptual in nature. There has been insufficient exploration to estimate a Mineral Resource and it is uncertain whether further exploration will result in the estimation of a Mineral Resource.

Figure 1: Banana Lithium Project location

2026 drilling program

Drilling commenced as planned in July, and continued through the Quarter. Fifty holes were completed in the Quarter for 14,805 metres. Drilling is helicopter-supported out of Camp Coulon. Two rigs operated through July with a third drill rig added on 24 July. Three drill rigs were operating from that point through July and August, diamond drilling NQ diameter size holes, and a fourth was mobilised in September. The fourth rig drilled both NQ and HQ-diameter holes. Three HQ holes were completed in the Quarter, serving both as geological holes to support future resource estimation and as a source of larger-diameter core for additional metallurgical test work.

	July	August	September	Quarter	October	Total Program
Rigs operating	3	3	4		4	
Metres drilled	2,887	4,422	7,496	14,805	4,676	19,481
Holes completed	9	16	25	50	15	65

Drilling activities during the Quarter focused on testing the lateral and down-dip extent of the Spodumene Mountain prospect pegmatite system. The program was designed to assess how far the structurally controlled spodumene-bearing pegmatites extend beyond previously drilled areas and to support future resource definition work.

As announced on 9 September 2026 and 29 September 2026, the visual assessment¹ of the first 17 holes to be drilled, which included 14 holes in the southwest and northeast zones extended the known strike length from 650 m to 1,400 m. The remaining 33 holes drilled were drilled within the 100 m by 100 m grid in the central zone. Assay results for these 17 holes were received after the Quarter (see below).

¹Cautionary Note: Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations.

Figure 2: Diamond drill rig, 2026 drilling program

Site visit

The Company hosted a visit of brokers, analysts, investors and the Board to site on 14-15 September. Three brokerages commenced research coverage of the Company in September 2026.

Figure 3: Site visit, September 2026 at the site of channel sampling at Spodumene mountain outcrop.

Program completed post Quarter

As announced on 20 October 2026, the 2026 drilling program was completed safely and on plan, with changing weather conditions preventing further drilling. In total, 65 diamond holes were completed for 19,481 metres, and every hole intersected pegmatite. Drilling and outcrop mapping have delineated an area of approximately 1,400 m along strike and 500 m down dip, and the system remains open along strike and down dip. Core processing continues on site.

First assay results post Quarter

As announced on 28 October 2026, assay results have been received for the first 17 holes (BL26-030 to BL26-046), for which visual estimates were previously announced. The results confirm multiple thick, high-grade intercepts, including 84.0 m at 1.84% Li_2O from 8.0 m (BL26-041), 51.0 m at 2.24% Li_2O from 52.5 m (BL26-044), 38.6 m at 2.29% Li_2O from 156.5 m (BL26-038) and 37.9 m at 2.47% Li_2O from 152.9 m (BL26-045). All reported intersections are downhole lengths, interpreted to be approximate true widths. The prospect remains open along strike and at depth, and further assay results will be announced as they are received, validated and reviewed.

Sampling and assays

Drill core is transported via helicopter to a processing facility at Camp Coulon on a daily basis, visually logged, and sampled at intervals of 0.3 m to 2.0 m (with the exception of four samples which include intervals of core loss that increase their recorded lengths beyond 2.0 m) adjusted to geological contacts, with a target of 1.0 m. Certified reference materials, blanks and duplicates are inserted into every sample batch. Downhole surveys are taken with a gyroscopic tool. Samples are sent to the contract laboratory in Calgary for preparation and analysis.

By 30 September, core samples from 21 holes had been dispatched to the laboratory. Assay results will be announced once received, validated and interpreted. The first assay results, for 17 holes, were announced on 28 October 2026.

Figure 4: Camp Coulon

Other field work

LiDAR and orthophoto surveys were completed during the Quarter over all known LCT pegmatite occurrences on the Project. The images and data are being processed. A bathymetry survey was completed on the waterbody south of the Spodumene Mountain outcrops during the Quarter, recording a maximum water depth of approximately 2 metres.

Exploration expenditure

Exploration and evaluation payments in the Quarter were C\$4.8 million, representing part payment for the 2026 drilling program, including drilling, helicopter and aviation support, camp, and geological services. A further C\$0.2 million was paid for claim renewals.

Next steps

In the coming quarter, WhiteRock plans to complete core processing and report the remaining assay results from the 2026 program, commence work toward the maiden Mineral Resource Estimate, commence preliminary planning for the environmental approvals pathway, and progress engagement with local communities and other stakeholders.

Subject to the results of the 2026 drilling program, the Company is targeting a maiden Mineral Resource Estimate for Spodumene Mountain in H1 2027.

Mining production and development

The Company did not undertake any mining production or development activities during the Quarter.

Corporate

Listing on ASX

The Company completed its initial public offer under the Prospectus dated 30 June 2026, issuing 1,846,154 CDIs at A\$3.25 each to raise A\$6.0 million before costs. WhiteRock was admitted to the Official List of ASX on 20 August 2026 and its CDIs began trading on 24 August 2026. Euroz Hartleys Limited was Lead Manager.

Figure 5: Board members at the ASX listing ceremony

Warrant exercises

During the Quarter, holders exercised 515,000 warrants at C\$1.35 each for proceeds of C\$695,250. Applications for quotation of the resulting securities were lodged during the Quarter.

Cash position and expenditure

Cash at 30 September 2026 was C\$24.8 million (30 June 2026: C\$25.4 million). The main cash flows in the Quarter were:

- exploration and evaluation payments of C\$4.8 million;
- payments for claim renewals of C\$0.2 million;
- administration and corporate payments of C\$1.9 million, of which C\$1.1 million were costs of the IPO and listing;
- staff costs of C\$0.1 million; and
- receipts of C\$5.9 million from the IPO and C\$0.7 million from warrant exercises, less C\$0.4 million of share issue costs.

Exploration payments lag field activity. At 30 September 2026, approximately C\$4.8 million of 2026 drilling program costs had been incurred but not yet paid, and were not included in the Quarter's cash flows.

Tenements

All tenements are map-designated claims (CDC) in Québec, Canada, held 100% by WhiteRock Lithium Corp.

Claims	30 Jun 2026	30 Sep 2026	Area at 30 Sep (ha)	Interest
Banana Lithium Project	1,360	1,360	67,245	100%

A schedule of every claim held at 30 September 2026 is set out in Appendix 1. No claims were acquired, disposed of or allowed to lapse during the Quarter, and the Company is not party to any farm-in or farm-out agreement.

Use of Funds

The Quarter is covered by the use of funds statement in section 4.5 of the Prospectus dated 30 June 2026. The table below compares actual expenditure against that statement.

A\$'000	Per Prospectus ⁽¹⁾	Opening cash adjustment ⁽²⁾	Expended since Admission	Balance to be expended
Exploration work program	26,043	(1,172)	(3,852)	21,019
Corporate administration	3,281	(623)	(377)	2,281
Working capital	1,548	(373)	(4)	1,171
Remaining costs of the offer	1,180	(175)	(906)	99
Total	32,052	(2,343)	(5,139)	24,570

(1) Prospectus amounts are as stated in A\$ (total A\$32,052,000, inclusive of oversubscriptions). The Company pays its expenditure in C\$; each payment is translated to A\$ at the Bank of Canada exchange rate on the date it was paid.

(2) Expenditure paid from existing cash reserves between the Prospectus date and Admission on 20 August 2026, principally the start of the 2026 drilling program and costs of the offer.

(3) The Prospectus was supplemented by supplementary prospectuses dated 8 July 2026 and 12 August 2026. Neither changed the use of funds statement.

Of the A\$26.0 million allocated to exploration, A\$5.0 million had been paid by 30 September.

Payments to Related Parties

Payments to related parties and their associates in the Quarter totalled C\$55,000. They comprised non-executive director fees of C\$14,500 and executive director fees of C\$40,500.

About WhiteRock Lithium

WhiteRock Lithium Corp. is an ASX listed Canadian critical minerals exploration company focused on lithium exploration in Québec, Canada. The Company's flagship asset is the 100%-owned Banana Lithium Project, comprising approximately 67,000 hectares across the Nunavik and Eeyou Istchee James Bay regions of northern Québec.

Exploration within the Nunavik portion of the Banana Project has identified an extensive spodumene-bearing LCT pegmatite system, including the Spodumene Mountain, Isabella and Marine prospects. The Company's inaugural 2024 drill program comprised 29 diamond drill holes, with LCT pegmatite intersected in every hole. Significant results from the Company's inaugural 2024 drill program at Spodumene Mountain included 79.3 m at 2.00% Li₂O from surface, 64.7 m at 2.14% Li₂O and 60.7 m at 1.89% Li₂O. These results were reported in the Prospectus dated 30 June 2026 (refer to Previously Reported Information below). The Company confirms that the form and context in which the Competent

Persons findings in relation to the above exploration results are presented have not been materially modified from the Prospectus.

WhiteRock is systematically exploring the Banana Lithium Project through drilling, geological mapping, geophysics and other exploration activities to further evaluate the scale, continuity and mineralisation potential of the LCT pegmatite system.

Previously Reported Information

The information in this report that relates to Exploration Results previously announced by the Company in the ASX announcements dated 9 September 2026, 29 September 2026, 20 October 2026 and 28 October 2026, and the information that relates to the Exploration Target is extracted from the Prospectus dated 30 June 2026, each available at www.asx.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in those announcements and that the form and context in which the Competent Persons' findings are presented have not been materially modified.

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end C\$'000	Amount drawn at quarter end C\$'000
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end	nil	
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
The Company has no financing facilities.		

8. Estimated cash available for future operating activities	C\$'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(6,591)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(6,591)
8.4 Cash and cash equivalents at quarter end (item 4.6)	24,834
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	24,834
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	3.8
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: N/A	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 October 2026

Authorised by: The Board of Directors
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
