A\$4.8 million research and development cash rebate received

Melbourne, Australia – Clean TeQ Holdings Limited (**Clean TeQ** or the **Company**) (ASX/TSX:CLQ; CTEQF:OTCQX) is pleased to advise it has received a cash payment of approximately A\$4.8 million from the Australian Tax Office (**ATO**), representing the refundable tax offset available under the Research and Development (**R&D**) Tax Incentive for FY17.

Clean TeQ's R&D activities during FY17 included valuable work to further advance the Company's proprietary Clean iX® continuous ion exchange technology platform. These efforts have generated significant benefits for the development of the Clean TeQ Sunrise Nickel/Cobalt/Scandium Project, as well as several important projects currently being commercialized within Clean TeQ Water.

Clean TeQ's Chief Executive Officer, Sam Riggall, commented, "*Clean TeQ places a high priority on the ongoing development of our proprietary technologies, while we simultaneously look ahead to new breakthroughs in our key areas of competency; minerals processing and water purification. The R&D Tax Incentive is a critical enabler of fostering innovation in Australia and we value the Commonwealth Government's continued support for this important initiative.*"

The R&D Tax Incentive program is designed to provide targeted R&D rebates and tax offsets to encourage more companies to engage in R&D. The R&D tax incentive aims to boost competitiveness and improve productivity across the Australian economy by:

- encouraging industry to conduct R&D that may not otherwise have been conducted
- improving the incentive for smaller firms to undertake R&D
- providing business with more predictable, less complex support

The ATO jointly administers the R&D tax incentive with the Department of Industry, Innovation and Science (on behalf of Innovation and Science Australia).
