ACN 154 103 607

ASX Release
Sydney, Australia – 18 August 2021

Launch of Operator Tactical Solutions

Indoor Skydive Australia Group Limited (ASX:IDZ) (ISA Group) announces the launch of its new business unit, Operator Tactical Solutions (Operator).

Operator builds training and simulation products for global defence and law enforcement agencies, using Virtual Reality and Augmented Reality technologies.

Operator was created to solve the problem of integrating training with technology, increasing soldiers performance and complementing existing training systems. Operator, a wholly owned subsidiary of ISA Group, has been established to capture Defence and related projects within the company.

Operator's first product is a "free roam" Virtual Reality based tactical training solution, that allows tactical teams to train drills without the need for specialised facilities. The product prototype is complete and a minimum viable product will be ready by November 2021 for field testing. Pilots are being targeted towards Australian and US Special Forces in late 2021. Red Cartel, ISA Group's in-house Virtual Reality production company is developing the system.

CEO Wayne Jones said "Given the company's deep roots and experience in the Australian Defence force and special operations, we see this as a natural fit and additional offering to our current training relationships. With a product roadmap which includes law enforcement de-escalation training, tactical planning tools and other live operational support, we are excited to announce the launch of Operator Tactical Solutions."
