## 1. OVERVIEW

MinRes' Board and management consider that an uncompromising commitment to safety, environmental performance, corporate governance, and accountability is essential for the Group to achieve its objective of being a world class supplier of goods and services to the resources sector. As a result, specific corporate governance policies have been issued to detail the expected behaviour required from MinRes employees and major sub-contractors, to ensure these objectives are met.

The Australian Securities Exchange (ASX) Corporate Governance Council released the fourth edition of its "Corporate Governance Principles and Recommendations" ("Recommendations") in 2019. The Board supports the principles laid out in the Recommendations. Although the Recommendations are not prescriptive, the ASX Listing Rules require disclosure of the extent to which the Recommendations have been followed, and for the Group to identify and provide reasons for those Recommendations that have not been followed. The Recommendations are listed below, along with details on how the Group has addressed the Recommendations, whether the Group is compliant with the Recommendations, and the location of relevant documents/reports.

The Charters for the Board, Sustainability Committee, Remuneration and People Committee, Nomination Committee and Audit and Risk Committee were reviewed by the Board and have been updated within the last 18 months.

All Charter and Corporate Governance Policies are available at the Corporate Governance section of the Group's website: www.mineralresources.com.au. Reference is made in the table below to where evidence of compliance with the Recommendations can be located.

	Selection and Appointment of Director Procedure				
	The Company's Selection and Appointment of Director Procedure, available on the Group's website, outlines that when appointed to the Board, a new Director will receive an induction appropriate to their experience, to allow new Directors to participate fully in Board decision-making at the earliest opportunity, and enable new Directors to gain an understanding of the Group's operating environment, financial, strategic, operational and risk management positions.				

Via the Board's annual Board Evaluation Process the Board reviews its composition, performance and working relationships to ensure that the Board continues to have the mix of skills and experience necessary for the conduct of the Group's activities.

Where deficiencies are identified, these are addressed either by seeking new appointments to the Board, or by arranging appropriate professional development for existing Board members.

## **Board Nomination Committee Charter**

The Nominations Committee Charter, available on the Group's website, includes the following related objectives:

- to assess and make recommendations to the Board on the appropriate mix of skills, experience, expertise and diversity required on the Board and each Committee, and regularly assess the extent to which they are represented on the Board or relevant Committee
- make recommendations to the Board in relation to Board succession planning, including the succession of the Chair and Committee chairs, to ensure maintenance of an appropriate mix of skills, experience, expertise and diversity on the Board, and
- review the process for the induction and education of new Directors and any continuing education for existing Directors.

#### **Material information**

In accordance with the ASX Listing Rules, the Company must immediately notify the market via an announcement to the ASX once it becomes aware of any information concerning the Company which a reasonable person would expect to have a material effect on the price or value of the Company's securities (Material Information).

ASX announcements are placed on the Investors section of the Company's website as soon as practicable after the ASX confirms receipt and release of that information. The Company is required to disclose information, if asked to do so by the ASX, to correct or prevent a "false market" (defined by the ASX to be a situation where there is material misinformation or materially incomplete information in the market which is compromising proper price discovery).

As noted in the Company's Continuous Disclosure Policy, the Company is deemed to have become aware of information where a director or executive officer has, or ought to have, come into possession of the Material Information in the course of the performance of his duties as a director or executive officer.

The Company is aware that the Corporations Act's definition of a "material effect on price or value" is where a reasonable person would be taken to expect information to have a material effect on the price or value of the Company's securities if the information would, or would be likely to, influence persons who commonly invest in securities in deciding whether to acquire or dispose of the securities.

Several investors and proxy advisors use independent ESG rating agencies to assess a company's ESG performance. The Company actively engages with select third party agencies to ensure their data and assessment of Company performance is accurate.
