

ASX ANNOUNCEMENT
(ASX: MTO)

9 April 2024

SHERCO AND LAMBRETTA DATA BREACH

MotorCycle Holdings Limited (ASX: MTO) (the **Company**), has been made aware that a Threat Actor (Actor) has unlawfully gained access to a third-party hosted web server for two of its branded websites, Sherco and Lambretta (the Websites) used in its MOJO Motorcycles' business.

The Actor inserted malicious code into the websites which may have resulted in the exposure of some customer personal information, including names, addresses, email addresses and phone numbers. Additionally, the Actor had gained access to the server, which stored customer responses to webforms from the Websites.

Customers who were affected by this security breach will be notified individually. Customers who are not contacted have not had their details accessed in the breach.

MOJO Motorcycles was acquired by MTO in October 2022. There has been no compromise of any other MTO platforms identified at this stage and the data breach has had no impact on the Company's ongoing operations. The Company's internal network is unaffected by this breach as the servers are not linked.

We will continue to keep our customers, shareholders, and key stakeholders updated as we respond to this event and our investigation continues and further facts are established.

-ENDS-

This announcement was authorised for release by the Company's Disclosure Committee.
