

STRAITS RESOURCES LIMITED
(ASX: SRQ)

**Joint Venture agreements signed with Gold Fields on the Blayney and
Cheesemans Creek projects in NSW**

Straits Resources Ltd (Straits) is pleased to announce the finalisation of two Farm-in agreements with Gold Fields Australasia Pty Ltd (Gold Fields) on the **Blayney** and **Cheesemans Creek** tenements in NSW. The principal terms of the agreements are as follows

Blayney (Exploration license 5922)

Gold Fields has the right to earn up to 80% of the project by sole funding \$25 million in exploration expenditure over twelve years with the following principal terms;

- Gold Fields may earn a 60% interest by sole funding \$10 million on exploration in respect to the tenement within a period of six years.
- After earning the minimum interest, Gold Fields may elect to continue to sole fund (a further \$15 million) and earn an additional 20% within a period of a further six years.
- Each earn in point crystallises a payment to Straits for the resources already discovered at Blayney. The existing JORC resource on the Project is approximately 1 million troy ounces of gold. To recognise the value of the existing resource, Gold Fields will make a payment to Straits based on the existing resource as part of exercising the 60% and 20% options. For the purposes of the 60% option, the payment is calculated as follows: crystallisation payment=0.6 x (existing resource x \$5). For the purposes of the 20% option, the payment is calculated as follows : crystallisation payment=0.2 x (existing resource x \$5).

The Blayney Project is located 35km south of Orange, NSW and covers the eastern margin of the Forest Reef Volcanics within the Lachlan Fold Belt. The area which is close to the Cadia and Ridgeway gold deposits of Newcrest Mining Ltd is considered one of the most prospective geological environments for porphyry related gold-copper mineralization.

Cheesemans Creek (Exploration licenses 5979 & 7321)

Gold Fields has the right to earn up to 80% of the project by sole funding \$14 million in exploration expenditure over eight years with the following principal terms;

- Gold Fields may earn a 60% interest by sole funding \$4 million on exploration in respect to the tenement within a period of four years.

- After earning the minimum interest, Gold Fields may elect to continue to sole fund (a further \$10 million) and earn a further 20% over four years.

The Cheesemans Creek Project in NSW is underlain by Ordovician rocks of the Lachlan Fold Belt considered highly prospective for porphyry related mineralization.

Straits is delighted to enter into these “earn in” agreements with Gold Fields, one of the world’s largest producers of gold, with attributable annualised production of approximately 3.5 million gold equivalent ounces from operating mines in Australia, Ghana, Peru and South Africa.
